SUMMARY

I am a backend developer specializing in .NET Core technologies. I have actively participated in all phases of the Software Development Life Cycle (SDLC), contributing not only as a developer but also by engaging directly with clients to gather requirements, analyze problems, and define new features.

In addition, I continuously invest in my professional growth by learning from industry experts with international experience, acquiring advanced knowledge across various domains and applying these insights in my work. I work in an Agile/Scrum team with two-week sprint cycles and have contributed to sprint planning, task estimation, and delivery.

CORE COMPETENCIES

- Languages & Frameworks: C#, .NET Core, Web API, Express JS
- Databases: SQL Server, PostgreSQL, Entity Framework Core
- Architecture & Design: RESTful APIs, Clean Architecture, Microservices,
- Caching & Messaging: Redis, RabbitMQ
- Tools & DevOps: Git, Docker, CI/CD
- Practices & Methodologies: Agile (2-week sprints)
- Front Tech: Angular
- Languages: English (Pre-Intermediate)

PROFESSIONAL EXPERIENCE

U and R Company

I contributed to the development of new projects, provided technical support for legacy systems, and participated in the continuous improvement and development of existing applications.

Projects:

1. Cabinet Platform

Developed and maintained the core web platform responsible for generating the majority of the department's revenue.

Worked on a system serving 4 different client services.

Supported an average of ~200 active users per month.

Contributed to feature development, bug fixing, and performance improvements.

2. Invoice System

I provided technical support and continuous development for the supplier invoice processing system of one of Azerbaijan's largest retail chains.

The system processes approximately ~184,000 invoices per month.

I provide support to an average of ~250 active users per month.

3. Other Projects

Contributed to multiple internal and client-facing applications by developing new features, fixing production issues, and supporting system maintenance tasks.
